DETAILED ACTION

Response to Amendment

1. The reply filed on 6/15/05 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): Applicant failed to submit the species the applicant desires to pursue. See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. **EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).**

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Claims 1-90 show various embodiments as illustrated in figures 1-29.

- (1) Species I, related to identifying segments based on color
- (2) Species II, related to identifying segments based on multiple parallel lines
- (3) Species III, related to identifying segments based on convergence
- (4) Species IV, related to identifying segments based on lack of motion
- (5) Species V, related to identifying segments based on a model, texture, and uniform color
- (6) Species VI, related to identifying segments based on scene changes
- (7) Species VII, related to identifying segments based on slow motion

(8) Species VIII, related to identifying segments based on single frame verification

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 5, 9, 65, 68, 74, 76, 78, and 80 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dave Czekaj whose telephone number is (703) 305-3418. The examiner can normally be reached on Monday - Friday 9 hours.
